AT THE EXECUTIVE HOTELS & RESORTS IN BURNABY, BC

IT'S FINALLY HERE, the product you have been waiting for!
AIM — the No Power, No Phone Line Notification System that uses the GSM network. **AIM** has a patented board that does not require AC power and will operate from a long-lasting battery or solar panel.

The **AIM** unit is installed for the purpose of notification to the end user. An ideal solution for applications in remote areas, cottages, barns, silos, sheds, trailers, trucks, boats, RV's, etc.

AIM uses Armstrong's Communication monitoring facility for their notification provider. Armstrong's has been providing third-party dealer monitoring since 1989.

Ideal for remote locations, AIM utilizes GSM technology for notification when an event occurs.

FEATURES:

- **Two ULC (Burglary & Fire) monitoring stations** including two-way audio experts and fully bilingual operators.
- **Live operator answering.** All outbound calls are made in **your company name**, building a stronger relationship between you and your client.
- **Disaster recovery plan** with back-up station
- **Dedicated Dealer Tech Support** with all major upload and download software.
- **Dealer Access** via the internet allows you to run reports, email, view signals live, etc.

AIM uses Armstrong's Communication facility as their notification provider.

Please contact **Kim Schellenberg** to confirm your attendance:
